

User Guide:

Web Mobile Push Notification
For Magento 2

Installation:

1. Upload the extensions package to your Magento root directory and unzip it.
2. Connect the ssh console and cd to the root directory of your Magento installation.
3. Please run the below commands:
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy
php bin/magento cache:clean
php bin/magento module:enable Coduzion_pushnotification
4. After running the above commands, Flush the store cache.
5. After this, log out from the backend once and log in again.

1. Create Push Notification

Create new push notification by clicking on “Add new campaign”

Manage Campaign 🔍 🔔 👤 EST_admin ▾

Collect Api Credentials from Google Firebase

Create new project here: <https://console.firebase.google.com>

Collect Api Credentials from Google Firebase

Go to [Project overview > Project Settings](#)

Collect Api Credentials from Google Firebase

Collect the below marked credentials and add it to Push notification extension configuration

The screenshot displays the 'Project settings' page for a Firebase project named 'CODUZION Technologies'. The page is divided into several sections:

- Your project:** This section contains the following fields:
 - Project name: CODUZION Technologies
 - Project ID: coduziontechnologies
 - Project number: 1017746435101
 - Default GCP resource location: Not yet selected
 - Web API key: No valid API key for this project?
- Environment:** This section contains the following field:
 - Environment type: Unspecified
- Public settings:** This section contains the following fields:
 - Public-facing name: project-1017746435101
 - Support email: Not configured

Green arrows point to the following fields:

- Project name
- Project ID
- Project number
- Default GCP resource location
- Web API key
- Environment type
- Public-facing name

Collect Api Credentials from Google Firebase

Collect the below marked credentials and add it to Push notification extension configuration

The screenshot displays the 'Project settings' page for a Firebase project named 'CODUZION Technologies'. The 'Cloud Messaging' tab is selected. Two API settings are shown:

- Firebase Cloud Messaging API (V1)**: Enabled. Shows a Sender ID of 680476696509 and a Service account link.
- Cloud Messaging API (Legacy)**: Enabled. Shows a table with the following data:

Key	Token
Server key	AAAAAnm-SX70:APA91bFYnzKVgAe8TFPBJXNRvGhdvsaYmVT3UAYzoGaTC1nACIES2AqhTHuWPwH0FI6yC DZIAH3FIP7tQf5JRV6n2aTufn7S7ugdVz56TfYcJrT8T0hZEcoDUNpIAIP6_OURgdkUO
Sender ID	680476696509

Green arrows point to the Sender ID, Server key, and Sender ID fields. A 'Web configuration' section is visible at the bottom.

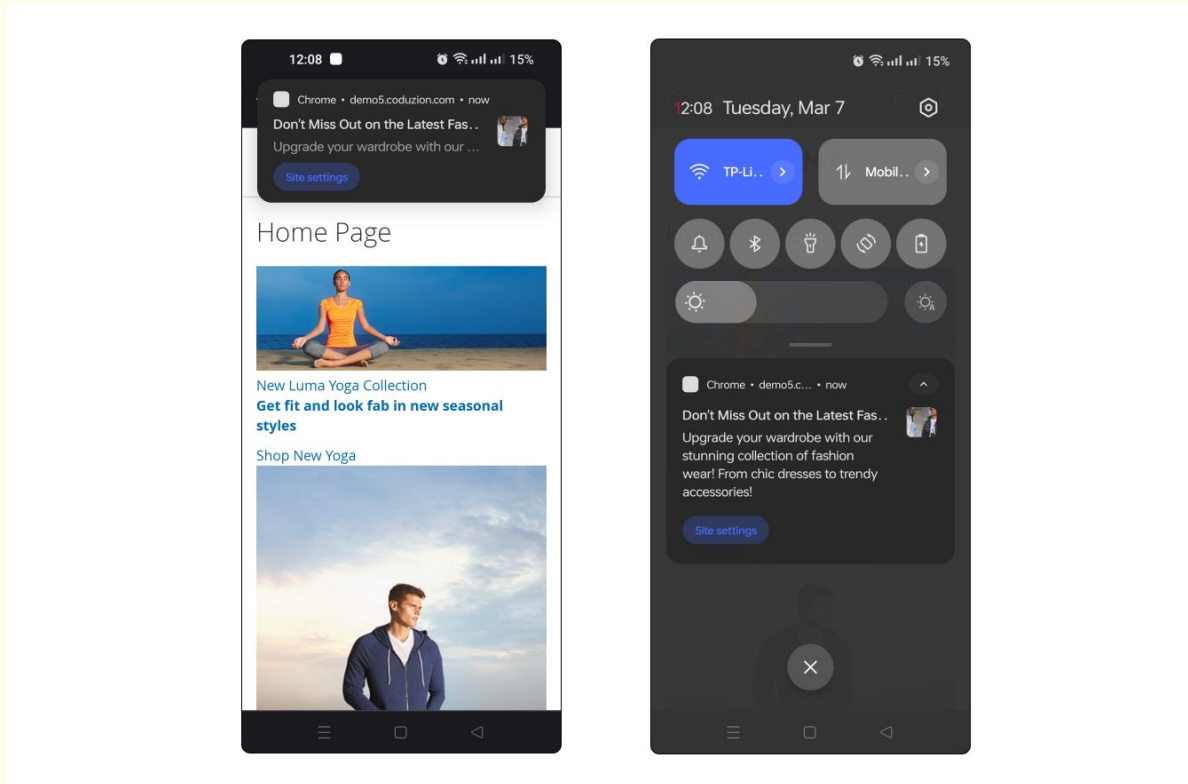

Front-end View: Web Push notification

The screenshot shows the front-end view of the LUMA website. The header features the LUMA logo on the left, a search bar with the text "Search entire store here..." and a magnifying glass icon, and a shopping cart icon on the right. Below the header is a navigation menu with links for "Coduzion", "What's New", "Women", "Men", "Gear", "Training", and "Sale". The main content area displays "Home Page" and a large image of a woman in a bright orange top and grey leggings meditating on a beach. A web push notification from Google Chrome is overlaid on the bottom right, with the text: "Don't Miss Out on the Latest Fashion Wear! Upgrade your wardrobe with our stunning collection of fashion wear! From chic dresses to trendy accessories! demo5.coduzion.com".
